INTERIM FINANCE UPDATE

INTERIM PROFESSIONALS WITHIN FINANCE & ACCOUNTING HAVE NEVER BEEN OF MORE IMPORTANCE THAN AT PRESENT. THE BUSINESSES WE CURRENTLY WORK WITH IN 2018 ARE WELL PLANNED FOR THE NEW YEAR WITH PROFESSIONAL CONTRACTORS IN FINANCE GETTING AS MUCH AS POSSIBLE IN PLACE FINANCIALLY, BOTH FROM A TECHNICAL AND COMMERCIAL PERSPECTIVE.

It has been an exceptionally busy year for our interim Finance & Accounting division. With a huge influx of new clients, new roles and an ever-growing candidate market, speed to market and execution has been of utmost importance. This coupled with the increase of digital and automated skill sets has improved internal processes across all product lines, which requires contractors to really hit the ground running more than ever.

It comes as no surprise that the fastest growing sector this year is the Technology market, which has grown 4% in 2018. It has now reached a \$3 trillion global turnover and has no sign of slowing down – quite the opposite in fact. Interim finance has played a large part in this for LMA, working and delivering on various roles both on a National and International scale.

Whilst there has been huge growth in these areas, we are also seeing growth in other various sectors, including Media, Property, FMCG, Professional Services, Manufacturing and the Hospitality Sector. Again, this can be seen as a knock-on effect

from the growth in technology – as Technology expands, it will automatically increase business in other sectors as they look to secure and upgrade new systems, software/hardware and streamline processes.

In regards to contracting specifically within Finance & Accounting, a high number of our workload this year has been within the more Senior Management space and continues in to 2019. Current trends show that businesses are looking to secure their management team before April, in order to put them in the best position possible to expand in other areas. This is not to say that there hasn't been a high volume of accounts worked within the mid-level range of Finance as well – a huge influx of more transactional level roles is ever-increasing - as companies expand, their products increase, meaning there is naturally a higher workload all round. 2019 is a pivotal year for every business and product line – there has never been a more important time to get the financials in place than the coming 12 months and onwards.
